DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 4-32, 34-37 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious a power amplifier circuit that has, in combination with other limitations, a band-pass filter and a driver stage which receives the band-passed signal and produces the input signal to be transmitted to the first circuit element; neither does it have a second switch which alternately connects an isolated port of the first circuit element to ground or the bypass path; nor does it have a switch which alternately connects an isolated port of said second circuit element to ground or a signal distortion compensation path, a signal processing circuit which receives a first coupled signal from said input signal and a second coupled signal from said output signal and produces a distortion compensation signal, wherein when said switch connects said isolated port of said second circuit element to said distortion compensation path, said distortion compensation signal being input to said isolated port of said second circuit element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
